

TeleMetrix+

Time for Better Health

Delivering on the Promise of Telehealth

TeleMetrix+ enables patients to capture their biometric readings at the comfort of home and this information is easily available to the doctor, family caregivers and patient online.

Singapore's First Managed Telehealth Subscription Service

- Designed specifically for Medical Service Providers (MSP)
- **Complete end-to-end 'managed' service.** All biometric devices, infrastructure, reports, patient monitoring, support, training included
- **Simple flat rate monthly subscription fee.** No IT investment, support or maintenance costs.
- Robust cloud-based SaaS architecture.
- **Trained Health Success Executives** assigned to train and coach MP's and patients
- Device-agnostic, open standards telehealth platform.
- **NEHR standards-compliant**

Compelling MSP Benefits

- Allows doctors to easily and remotely monitor **more patients, without increasing workload.**
- Ideal for chronic care patients. Engages patients in own care, **improves patient compliance to treatment plans.**
- Enables MSP's to offer differentiated levels of care.
- **Convenient on-line access** to patient data from any pc, iPad or smartphone

Proven Stakeholder Benefits

- Encourages patients to **take responsibility for own health**, leading to better health outcomes
- Reduces need to visit clinic for simple routine check-ups. **Saves time and hassle**
- Gives patients **peace-of-mind** knowing their doctors are able to 'watch over them' at home
- Enables family caregivers to **more actively participate** in monitoring the health and lifestyle of their ageing parents
